THE TRAINING EXTRACT

The enclosed Training Extract has been put together to assist you in making training decisions. It is comprised of a series of computer printouts which show data collected from your specialty. By learning to understand this document and how it applies to training programs, you will find it to be a valuable source of information.

READING THE TRAINING EXTRACT

TABLE OF CONTENTS: The first page of the Training Extract lists a Table of Contents. The Table of Contents shows five things:

1. Report Number - shows the number and sequence of computer products in the Training Extract.
2. Element - shows the report ID of each computer product in the Training Extract. These numbers are of use only to OMSq personnel.
3. Program - shows the types of computer products included in the Training Extract. Usually there will be three types listed: (1) PRTMOD, (2) VARSUM, and (3) PRTJOB. Each type of printout will be discussed in more detail below.
4. Report Title - describes the general contents of each computer product included in the Training Extract.
5. Page Number - shows the page on which the respective products begin. These numbers are located at the bottom center of the page.

TYPES OF COMPUTER PRODUCTS:

PRTMOD: This computer product can display occupational survey data in a variety of ways. Primary displays included in most Training Extracts are:

- (1) in Job Inventory order (by duty)
- (2) in STS order
- (3) in POI order

The first page of each PRTMOD contains information which is useful primarily to OMSq Analysts. Of primary interest to the user is the "Description of Reported Task Factors" section at the bottom of the page. This section lists the full titles and the number of members in each data group represented across the various columns of the printout. The actual data display begins on page 2 of the individual printout. This page begins with an introductory paragraph which describes the type of data contained in the product. After the introductory paragraph comes the actual data. For information on groups or task factors displayed in the column headings, refer back to the listing on page 1. When a column heading describes a group of incumbents, the numbers listed below represent the percent of the group members who are performing the task listed at the left-hand side of the page. Where the column heading describes a task factor such as Training Emphasis, the numbers below represent the value of that task factor for the given task.

Training emphasis refers to the importance of providing training of the given task in some type of formal structured training program, such as resident technical training schools, field training, or formal OJT. It only applies to recommended training for first-enlistment personnel (those with 1-48 months TAFMS) or, in the case of lateral career leaders, first-assignment or first-job personnel (those with 1-48 months TICF). It does not apply when examining advanced courses for a career ladder. Tasks which senior career ladder personnel feel should be trained for first-assignment personnel have high training emphasis values, while those tasks which they feel do not require formal training have low training emphasis values.

To help in interpreting Training Emphasis ratings shown on several of the data products, standardized abbreviations are used. These abbreviations are as follows:

MEAN = Average Training Emphasis Rating

1 SD = 1 Standard Deviation above Mean Training Emphasis Rating

2 SD = 2 Standard Deviations above Mean Training Emphasis Rating

ABOVE AVG = "ABOVE AVERAGE" in Training Emphasis; Tasks that fall between the Mean and 1 SD

HIGH = "HIGH" in Training Emphasis; Tasks that fall between 1 SD and 2 SD

VERY HIGH = "VERY HIGH" in Training Emphasis; Tasks that fall above 2 SD

VARSUM: While the PRTMOD product gives data on the various tasks being performed, the VARSUM product gives information concerning the responses of career ladder incumbents to the various background questions in the job inventory. Page 1 of the VARSUM will list the groups which are displayed on the product, showing a group ID number, group title, and number of people in the group. These group identities define the groups which comprise the column headings on each page of the VARSUM product. Along the left-hand side of each page, you will see a series of variable numbers, followed by their respective descriptions (i.e. V0000 Equip Used - Automatic Film Processors). Each variable represents a response to a background question. For background questions which allow multiple responses, each response is given below the variable number. In most cases, only the "yes" responses will be displayed. The numbers to the right of each response represent the percentage of the given group (as identified on the first page of the product) who gave that particular response to the question.

PRTJOB: This product displays a computed job description for a given population. The two PRTJOBs included in this Training Extract display inventory tasks sorted by time spent by 811X and 812X personnel whom are in 1-48 mos TAFMS.

We hope this brief summary will help you get the most out of your Training Extract. This document has been designed and prepared to aid you in making and understanding training decisions. If you have any questions, feel free to contact us.

POI 30BRL30QR8121, Security Police Officer, Security Specialist (dated 7 Jan 91), is presented below with matched job inventory tasks and occupational survey data.

POI objectives are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. Training objectives can be compared with the percent performing, and the relative training emphasis ratings.

Performance objectives which are not well supported should be considered for deletion or replacement with objectives involving tasks performed by higher percentages of incumbents and rated higher in training emphasis. In addition, tasks which were not matched with POI objectives are listed in a "Tasks Not Referenced" section. These unreferenced tasks should be carefully reviewed to identify tasks which may warrant formal training and which should be included in future POIs.

For assistance in interpretation of this printout, contact USAFOMS/OMYA, at DSN 487-3694.

CTS L30R0121-001 Security Police Officer/Security Specialist, (dated Oct 90), is presented below with matched job inventory tasks and occupational survey data.

CTS items are listed below the dotted line, followed by a listing of matched tasks. Pertinent survey data are printed to the right of each task. These data can be used to validate CTS content and code levels. In addition, tasks which were not matched with CTS items are listed in a "Tasks Not Referenced" section. These unreferenced tasks should be carefully reviewed to identify new areas which may warrant inclusion in future CTSs. For assistance in interpretation of this printout, contact USAFONS/OMVA, at DSN 487-3694.

Security Police
Reported AFSC(s): 811X/812X

----- Variable/Group Distributions -----

The percent of reported group members who use, maintain or operate various types of equipment are presented under the column headings for the appropriate group. This percent using, maintaining, or operating equipment may be valuable in determining the relevancy of training and testing on or about these types of equipment.

Reports on the following groups were requested:

GP0002: DAFSC - 811X (n = 258)
GP0003: DAFSC - 812X (n = 362)
GP0121: All 811X Officers in 1-48 MOS TAFMS (n = 2)
GP0128: All 812X Officers in 1-48 MOS TAFMS (n = 65)

Security Police
Reported AFSC(s): 812X

----- Variable/Group Distributions -----

The percent of reported group members who use, maintain or operate various types of equipment are presented under the column headings for the appropriate group. This percent using, maintaining, or operating equipment may be valuable in determining the relevancy of training and testing on or about these types of equipment.

Reports on the following groups were requested:

GP0176: 812X Officers in USAFE with 1-48 Mos TAFMS (n = 7)
GP0177: 812X Officers in MAC with 1-48 Mos TAFMS (n = 1)
GP0178: 812X Officers in PACAF with 1-48 Mos TAFMS (n = 7)
GP0179: 812X Officers in TAC with 1-48 Mos TAFMS (n = 1)
GP0180: 812X Officers in SAC with 1-48 Mos TAFMS (n = 24)
GP0181: 812X Officers in AFLC with 1-48 Mos TAFMS (n = 1)
GP0183: 812X Officers in ATC with 1-48 Mos TAFMS (n = 1)
GP0182: 812X Officers in AFSPACOM with 1-48 Mos TAFMS (n = 1)

AFSC 011X tasks are presented in USAF Job Inventory order under Duty headings, with percent of TAFMS group members performing tasks and the relative training emphasis ratings presented to the right of each task.

Note that tasks are listed in alphabetical order under each Duty heading so that tasks may be easily located and cross-referenced. Differences between groups may be highlighted where there are large differences in percent members performing each task across the various groups.

AFSC 812X tasks are presented in USAF Job Inventory order under Duty headings, with percent of TAFMS group members performing tasks and the relative training emphasis ratings presented to the right of each task.

Note that tasks are listed in alphabetical order under each Duty heading so that tasks may be easily located and cross-referenced. Differences between groups may be highlighted where there are large differences in percent members performing each task across the various groups.
